

The Jackson Health Christine E. Lynn Rehabilitation Center, Miami, Florida

The Jackson Health Christine E. Lynn Rehabilitation Center is a nine-story, 270,000 square foot facility on 1611 NW 12th Ave. in Miami, Florida. The rehabilitation center contains 72 inpatient beds, multiple clinics, diagnostic and treatment areas, designated research space, aquatic therapy rooms, outpatient therapy rooms, and offices. It also consists of separate gyms for acute inpatient care, outpatient care, pediatric care, and individual specialty care. The facility has equipment and features to reintegrate patients into daily life.

Isolatek International's Recognized Applicator Kenpat applied our CAFCO® BLAZE-SHIELD® II HS & CAFCO BLAZE-SHIELD HP to the steel at the UHealth Jackson Rehabilitation Care. CAFCO BLAZE-SHIELD II HS & CAFCO BLAZE-SHIELD HP have been the most widely specified Dry Spray family worldwide for over forty years. The portland cement-based formulation makes it suitable to remain exposed to extreme weather conditions during construction. CAFCO BLAZE-SHIELD II HS & CAFCO BLAZE-SHIELD HP provides the flexibility needed when sequencing and scheduling projects for General Contractors and Project Managers. Helping contribute to project success is our proficient Customer Service team processing orders and our plant having readily available product. Both CAFCO products meet or exceed all major fire protection specifications for Commercial structures, including ANSI/UL 263, ASTM E119, CAN/ULC-S101, and provides up to 4-hour fire resistance ratings.

CAFCO BLAZE-SHIELD products have exceptionally high recycled content and other environmentally friendly characteristics, provide significant LEED credits, and contributes towards Lean Construction. The dry mix formulation eliminates the need to wash out pumps at the end of the day, which will reduce water requirements and waste on job sites. Its added R-value reduces roof insulation, and provides high thermal and acoustic properties, making CAFCO BLAZE-SHIELD energy and sound efficient. Not only helping environmentally but also saving money, in the long run, allowing CAFCO BLAZE-SHIELD II HS & CAFCO BLAZE-SHIELD HP to be the most cost-effective Dry Spray Material on the market.
